

Client Meet - 8th April, 2026

Workflow:

Quiz → LLM → Chunks → store in database → fetch from db

Generating Quiz questions are Librarian's job, change workflow

Google, Goodreads, Amazon

Workflows for the librarian

- To add books - API (get isbn)
- Adding q. to the db for book quizzes (AI based vs Non-AI based)
- add/modify tags
- Should be able to import./export books excel sheet, which contains either book name or isbn - if book title not ideal, kill it.
- Author's page - about the Author, other books
- Publisher's page - Publisher's data, books by publisher
- Filter books by publishers, authors, etc
- Generate tags for each book, which will be used in the chatbot
- Check isbn/industry standard for excel sheet imports
-

NEXT MEET - build db from excel sheet, addresses, geolocation, payments and delivery modules tbd
